

# STITCH KNITTED TEXTILE FABRICS

Stitch knitted fabric is a space formation made by web stratification with fibres arrangement predominantly in one direction. Fleece is reinforced by stitch knitting in the final phase.

The material for the production of the stitch knitted textiles predominantly consists of blend of fibres. It is possible to ensure colour toning of the final fabric and composition of natural (suction) materials or synthetic materials.

The fabric is made in weight per m<sup>2</sup> from 230 to the 300 g/m<sup>2</sup> in maximum width 200 cm. Products are suitable as technical, humanitarian and shipper coverlets, packaging material, washing and sweetening rags and upholstery textiles.
